Fetty Athiyatul Maula

Quality Assurance Engineer

Tangerang Selatan, Banten, Indonesia | fetty.maula98@gmail.com | +62 851-5639-2506 | linkedin.com/in/fetty-athiyatul-maula | maulaf.github.io | github.com/maulaf

SUMMARY

QA Engineer with 5+ years of experience in the banking, multifinance, and technology industries. Experienced in fast-paced agile environments and in collaborating across teams to deliver high-quality products. Skilled in manual testing (SIT, UAT, regression) and automation testing with Katalon Studio, Selenium, Appium, and Cucumber (BDD) integrated with CI/CD. Tests web, mobile, and desktop applications as well as APIs using Postman and Swagger, with SQL for data validation.

WORK EXPERIENCE

QA Engineer — *PT Higo Fitur Indonesia* Feb 2026 – Present

- Handle multiple projects, performing end-to-end testing including functional, integration, exploratory, and regression testing to ensure system quality and stability.
- Identify defects, validate bug fixes, and ensure a seamless user experience across modules.
- Collaborate with developers and project managers to support reliable product delivery.

Freelance QA Tester — *Mandiri Click* 2025

- Tested the Consent Dana Pensiun (pension fund consent) and Exit Management modules in the Mandiri Click app update against its Figma designs and prototype.
- Validated user flows, UI, and functionality against the design; wrote and executed test cases; reported bugs and design mismatches.

QA Engineer — *Ikonsultan · Placement at Maybank Indonesia* Jan 2025 – Jan 2026

- Tested Maybank Indonesia's sales digital tools across the mobile app, web platform, and admin portal using manual and automation testing.
- Designed test cases based on business requirements and executed tests.
- Worked closely with developers and business analysts to align on requirements and see every issue through to resolution.

QA Engineer — *Monster Group* May 2023 – Feb 2025

- Performed manual and automation testing for various projects and products, including mobile apps, web platforms, and admin portals.
- Created test cases, executed tests, and reported bugs, collaborating closely with developers, business analysts, and project managers.

QA Automation — *Sharing Vision · Placement at Bank Rakyat Indonesia (BRI)* May 2022 – May 2023

- Built test automation for the New Delivery System (NDS), the customer service system used across all BRI branches.
- Created automation scripts for general, financial, and non-financial features and integrated them into the CI/CD pipeline.

QC Engineer — *Persada · Placement at Astra Credit Companies* May 2021 – May 2022

- Performed manual testing (SIT and UAT) for AOL, the desktop application that runs Astra Credit Companies' business processes, including new and used vehicle payments.
- Wrote user manuals to guide end users.

Junior Programmer — *Primalogic Global Teknologi* Oct 2019 – May 2020

- Developed and maintained insurance applications using C# and Visual Studio, including bug fixes and minor change requests.

SKILLS

Testing Types Functional, Regression, SIT, UAT, End-to-End, Exploratory, API Testing

Methods & Techniques	Manual Testing, Test Automation, BDD, Data-Driven Testing, Boundary Value Analysis, Equivalence Partitioning, CI/CD Integration
QA Process	Test Planning, Test Case Design, Test Execution, Bug Reporting & Tracking, Root Cause Analysis, Test Documentation, Agile / Scrum
Tools	Katalon Studio, Selenium, Appium, Cucumber, Postman, Swagger, SQL, Jira, Azure DevOps, Git / GitHub, Chrome DevTools, Android Studio, Groovy
Domains & Platforms	Banking, Multifinance, Insurance · Web, Mobile (Android), API, Desktop

SELECTED PROJECTS

- **OrangeHRM Automation** — Web automation with data-driven testing and BDD in Katalon Studio. github.com/maulaf/Katalon-OrangeHRM
- **Petstore API Testing** — API test automation in Katalon Studio. github.com/maulaf/Katalon-Petstore-API
- **Automation Tiket.com (BDD)** — Web automation of a train ticket booking flow using Cucumber BDD. github.com/maulaf/Katalon-Tiket.com
- **Automation redBus (Mobile)** — Android mobile automation with Katalon and Appium. github.com/maulaf/Katalon-redBus
- **QA Test Case & Documentation Template** and **Bug & Defect Tracker** — Manual testing and defect management documentation. See maulaf.github.io

EDUCATION

Associate Degree (D3) in Informatics Engineering — *Politeknik POS Indonesia* 2016 – 2019

GPA 3.48 · Coursework: Data Structures and Algorithms, Object-Oriented Programming, Database Systems, Network Security, Mobile Programming

CERTIFICATIONS

- **Automation Testing using Selenium & Katalon Studio** — Udemy, Jan 2024
- **Katalon Professional Certification** — Katalon Academy, Mar 2023
- **SQL (Intermediate) Certificate** — HackerRank, Mar 2022
